Four-agent QA + release review

ATSResume (getresumescore.in), Rasoi, and Trivense. Agent 1 answered from code. Agent 2 ran 10 user personas. Agent 3 scored the dialogue. Agent 4 re-checked the repo and is the final authority. Source: local trees on 5 Sep 2026 — not a live device pass.

Agent 4 is the release gate

Independent code review added AdMob test-ID fallback, Rasoi precise-location vs Approximate Data Safety, paywall “4 picks / seasonal” vs code, and a live /join 404. Do not ship UPI settle or a production Play promote until Critical items are closed. Home/Plan fetch caps do not fix Storage 402.

72/100	4	12	10
OVERALL	CRITICAL	HIGH	USER ROUNDS

Release scores by area

Score / 100 · dashed line is the 80 ship bar · Agent 4 judgement after conversation + code review

Findings by severity

24 Agent 4-validated issues: Critical 4 · High 12 · Medium 5 · Low 3

Must fix before release

- Delete credentials markdown, rotate keys that lived there
- Trivense: recovery screen that sets password without the old one
- Trivense: apply upi_id migration; confirm UPI then mark settled
- Trivense: set production AdMob env on EAS; never ship Google test units

Should fix

- Rasoi: finish Firebase image migration (Storage 402)
- Trivense: drop RECORD_AUDIO / unused location; user-scope offline queue
- Rasoi listing: 5,000 recipes live on Recipes tab, not Home
- ATSResume: stop ranking for “Naukri resume score”
- Rasoi: Data Safety vs fine location; paywall 4 picks → 2
- Deploy Trivense website so /join/{code} is live; retry kit refunds

Improvements

- Rasoi admin: email + password + rate limit
- ATSResume hero: lead ₹249 five-pack, ₹69 secondary
- Point Trivense custom domain or document vercel.app everywhere
- Refresh Rasoi PRODUCTION_CHECKLIST paths and date

Nice to have

Remove dead seasonal rail UI. Align Play developer legal names. Expand Hindi dish aliases. Add accessibility labels on Rasoi Home cards.

Growth opportunities

ATSResume
Five-pack as the only above-the-fold CTA after a free JD score. That is the paid job-search burst, not a subscription.

Rasoi
Pantry-first Home is the differentiator. Grocery CTA on missing items is the Plus conversion, not a bigger recipe list.

Trivense
Confirmed UPI settle + WhatsApp card is the Splitwise-India wedge — only after balances actually clear.

Validated findings

ID	CATEGORY	ISSUE	SEVERITY	EVIDENCE	RECOMMENDATION	OWNER
F1	Shared · Security	Workspace credentials file holds live API keys and payment secrets	Critical	PROJECT_USERS_AND_CREDENTIALS.md (parent folder, not in product gitignores)	Delete from disk, rotate Razorpay/AI/Firebase keys that were copied there, never commit it	Security
F2	Trivense · Code	Forgot-password email logs the user in but cannot set a new password	Critical	App.js ~195–198 createSessionFromUrl; SettingsScreen.js requires currentPassword before updateUser	Add a recovery screen that calls updateUser({ password }) without the old password	Mobile
F3	Trivense · UX	Pay via UPI opens GPay/PhonePe but never records a settlement	Critical	src/utils/upiSettle.js openUpiPayment; AnalysisScreen.js paySettlement; no settled-status write in src/screens	After a confirmed UPI return, mark the pair settled (or ask “Did you pay?”) so balances update	Product
F19	Trivense · Play Store	AdMob falls back to Google sample/test IDs if EAS env is unset	Critical	src/config/admob.js ADMOB_APP_IDS / ADMOB_UNITS ?? TEST.*; eas.json production env has Sentry only	Set EXPO_PUBLIC_ADMOB_* on EAS, rebuild AAB, confirm isUsingTestAdUnits() is false on release	Mobile
F4	Trivense · Code	UPI ID column may be missing on live Supabase	High	supabase/migrations/20260905120000_profiles_upi_id.sql — not confirmed applied	Run the migration before shipping UPI settle; saving a UPI ID will fail until the column exists	Backend
F5	Rasoi · Code	Recipe images 402 Storage size exceeded — list-size cap does not fix this	High	backend/scripts/migrate-supabase-storage-s3-to-firebase.ts; HTTP 402 exceed_storage_size_quota	Finish Firebase/image migration; broken photos will dominate Play 1-star reviews	Backend
F6	Rasoi · Play Store	Public listing URL depends on open testing; production promote still waiting	High	App/docs/PRODUCTION_CHECKLIST.md item 10; package com.bhagihiri.rasoiapp	Keep open testing until images + pantry build are stable, then promote; do not claim full production	Mobile
F7	Trivense · Play Store	Android declares RECORD_AUDIO and ACCESS_FINE_LOCATION beyond settle/split features	High	android/app/src/main/AndroidManifest.xml; app.config.js permissions	Remove unused permissions and align Data Safety; Play can reject or flag over-collection	Mobile
F8	Trivense · Code	Offline expense queue is one device-wide list with no user id	High	src/utils/offlineExpenseQueue.js QUEUE_KEY @trivense/offline_expense_queue	Key the queue by user id; discard or isolate on logout	Mobile
F9	Rasoi · Play Store	Store and site say 5,000+ recipes; Home now fetches 2 and Plan 15	High	README.md; App/types/pagination.ts HOME_PICK_FETCH_COUNT=2 PLAN_MENU_SIZE=15 RECIPE_PAGE_SIZE=45	Listing copy: cook from pantry + browse Recipes. Do not imply the full catalog loads on Home	Mobile
F10	ATSResume · SEO	Keyword “Naukri resume score” still targets a product you explicitly say you are not	High	src/lib/site.ts SITE_KEYWORDS; FAQ in src/lib/product.ts says Naukri scores completeness	Keep the FAQ, drop or rewrite the keyword so Google is not promised Naukri’s score	Web
F12	Rasoi · Security	Password-only admin login bcrypt-compares against every admin row	High	backend/src/app/api/auth/admin/login/route.ts findMany + compare loop; no rate limit	Require email+password, rate-limit, lockout; password-only is a brute-force gift	Backend
F20	Rasoi · Play Store	App requests fine lat/lng while Play Data Safety only declares Approximate location	High	App/app.json ACCESS_FINE_LOCATION; utils/location.ts stores coords; store/play-console/manifest.json approximateLocation	City-only: drop fine permission and stop storing coords, or declare Precise location and update privacy	Mobile
F21	ATSResume · Code	If credit refund throws after consume, API returns 500 without creditRestored	High	src/app/api/ai/generate/route.ts catch after refundCreditServer fails	Retry refund with idempotency; never leave consume + generic 500	Backend
F22	Rasoi · UX	Paywall table still promises 4 Home picks and seasonal rails	High	App/constants/payments.ts PAYWALL_COMPARE_ROWS; planLimitCopy.ts up to 4 picks	Align copy with homePickCount 2 and	Product

ID	CATEGORY	ISSUE	SEVERITY	EVIDENCE	RECOMMENDATION	OWNER
					seasonal 0, or users will think Plus is broken	
F23	Trivense · SEO	Repo has /join/[code]; live vercel.app/join still 404 until website deploy	High	website/src/app/join/[code]/page.tsx in repo; live GET /join/DEMOCODE 404	Deploy the website project to Vercel after the moneyexpensemobile push	Web
F11	Trivense · SEO	Live site is trivense.vercel.app; email and package still trivense.app	Medium	website/src/lib/content.ts url; support@trivense.app; README	Point the custom domain or set NEXT_PUBLIC_SITE_URL consistently; OG already uses vercel.app	Web
F13	Rasoi · Play Store	iOS AdMob path still returns Google sample banner units	Medium	App/constants/admob.ts getAdMobBannerUnitId iOS → ADMOB_TEST_BANNER_IOS	Fine while iOS is unpublished; do not ship an iOS build until real units exist	Mobile
F14	ATSResume · UX	Hero still leads “from ₹69” while the conversion push is the ₹249 five-pack	Medium	src/components/landing/Hero.tsx body vs KitPricingTiers five_pack button	One primary price on the hero: five-pack, with ₹69 as secondary	Product
F15	Rasoi · Code	Production checklist is stale (17 Jun) and still names rasoi_mobile / rasoi_backend	Medium	App/docs/PRODUCTION_CHECKLIST.md	Rewrite paths to App/ and backend/; re-verify env, Maestro, privacy deploy	Mobile
F24	ATSResume · SEO	Product domain is getresumescore.in; support is support@resumeai.app	Medium	src/lib/site.ts SITE_DOMAIN; src/lib/product.ts support email	Add a getresumescore.in support alias or state both brands in footer/FAQ	Web
F16	Rasoi · UX	Seasonal Home rail is capped to zero but UI and plan flags still exist	Low	planFeatureLimits.ts seasonalRailMode none; index.tsx still renders HomeSeasonalRail	Remove dead rail UI or restore later as a Plus extra that does not add fetches	Product
F17	ATSResume · Agent Response	Support-style answers that say “unlimited Pro” or “monthly plan” would be false	Low	Conversation #10; README + src/lib/product.ts — pay per pack, no subscription	Pin FAQ: ₹69 / ₹119 / ₹249, credit restored on failed generation	AI
F18	Shared · Play Store	Developer names differ: Karbh It Solutions (Rasoi) vs Bhagihiri Applications (Trivense)	Low	Rasoi README; Trivense website/src/lib/seo.ts APP_DEVELOPER	Same legal entity on Play if they are the same publisher; otherwise expect account questions	Mobile

Agent 2 user-testing rounds

Agent 2 asked; Agent 1 answered from product code; Agent 3 scored the exchange.

1. Normal user — ATSResume

User. *I have a Naukri JD. How do I get my score and then a PDF?*

Product expert. Open getresumescore.in, build or import the resume, paste that JD, see the free keyword-match score. Pay when you apply: ₹69 one job, ₹249 for five. The pack is tailored resume PDF, cover letter, LinkedIn, interview prep. Naukri’s number is profile completeness — this score is this job’s keywords.

QA. Accurate. Next-step is clear. Residual: users still type “Naukri resume score” in Google (F10).

2. New user — Rasoi

User. *I just installed it. Aaj kya banaye? I only have dal and rice.*

Product expert. Set diet and region, add dal and rice to pantry. Home shows at most two meal picks ranked to what you have — not the full 5,000. Browse more on the Recipes tab (45 at a time). Missing masalas can open Blinkit/Zepto on trial/Plus.

QA. Correct fetch caps. New users will still expect a long Home feed because Play says 5,000+ recipes (F9).

3. Confused user — Trivense

User. *Is this Splitwise? Can I pay my roommate from the website?*

Product expert. It is an India-first Splitwise-style board app: who owes whom, no daily expense cap on Free. You cannot UPI-pay from the website. Open the Android app, add a UPI ID in Profile, then Pay via UPI on a row you owe. That opens GPay/PhonePe. The site is trivense.vercel.app — not a live trivense.app storefront.

QA. Domain answer is correct. Product gap: UPI does not close the balance (F3) and the column may be missing (F4).

4. Power user — Rasoi

User. *I want tomorrow's 5 meals, shuffle, download 20 recipes offline, and grocery the gaps.*

Product expert. Free: today only (5 slots). Trial/Plus: Today + 2 more days (15 recipes fetched). Shuffle limits: Free 1/day Home, 0 Plan; Plus unlimited. Offline downloads: 0 Free, 5 trial, 30 Plus — 20 is Plus-only. Grocery checkout is trial/Plus. Allergy filter is Plus.

QA. Accurate vs planFeatureLimits.ts. PaywallCompare still shows trial/Plus Home as 4 + seasonal Full (F22) — Agent 1 was right; the in-app paywall is not.

5. Impatient user — ATSResume

User. *Just give me the PDF. Now.*

Product expert. There is no instant PDF without a profile + JD + payment. Free path is score only. Fastest paid path: import PDF → paste JD → five-pack ₹249 → generate. If generation fails, one credit is restored and the green notice says so.

QA. Accurate but the product is slow for this persona. Hero "See my ATS score" is right; impatient users bounce at builder length.

6. Non-technical user — Trivense

User. *My friend ate dinner and didn't pay. What do I tap?*

Product expert. Open the board → Analysis (who owes whom). If they owe you, they tap Pay via UPI (they must add UPI in Profile). You tap the WhatsApp icon to share "who owes whom". Adding a UPI ID is in Profile, not on the settle screen.

QA. Workflow is buried. Non-technical users will think Pay finished the split (F3). Hindi copy exists; the UPI field is English-placeholder heavy.

7. Edge-case user — Rasoi

User. *I am Jain. Search पराठा at 1am. Also show Diwali specials.*

Product expert. Jain is a diet choice; picks should be Jain-safe. Hindi aliases include पराठा → paratha. Late night Home is 1 late-night + 1 breakfast (still max 2). Diwali/seasonal rail is turned off — Plus does not get extra seasonal cards anymore.

QA. Agent 1 passed the seasonal hallucination trap. Hindi coverage is a small alias list, not full Hindi NLP.

8. Failure user — ATSResume

User. *I paid and the kit failed. Did you steal my credit? Also I entered a blank resume.*

Product expert. Invalid resume refunds and returns creditRestored + balance. AI/provider failure refunds the same way; the analyze page shows "Application credit restored". A CreditsError (no credits left) does not refund. Payment itself is Razorpay — this is generation, not checkout.

QA. Matches generate/route.ts. Failure user is handled in product now. Residual: user may still not notice the green banner vs a red error.

9. Follow-up user — Trivense

User. *I sent the reset email. Then I opened the link. Then I tried Settings → new password. Why does it ask for current password? Then I joined a board from Chrome.*

Product expert. The deep link creates a session and returns — there is no "set new password" screen. Settings still demands the old password, so recovery is stuck. Join in Chrome hits trivense.vercel.app/join/{code} (page exists). Joining in-app still requires login; Free allows one shared board.

QA. Agent 1 correctly admitted the broken recovery (F2). Web join exists — older Expo QA that said the route was missing is stale.

10. Adversarial user — Shared

User. *ATSResume has unlimited Pro, right? Rasoi Plus still loads seasonal picks? Trivense.app is live? Home downloads 100 recipes? UPI inside the app holds my money?*

Product expert. No Pro subscription. Seasonal rail pick counts are 0. Live site is trivense.vercel.app. Home fetch is 2, not 100. UPI only opens GPay/PhonePe; Trivense never holds the money and does not confirm payment.

QA. No hallucinations. This round is the quality bar for any future support bot.

Adversarial round passed

Agent 1 did not invent a Pro subscription, a live trivense.app storefront, a 100-recipe Home download, in-app money holding, or Plus seasonal extras. Remaining failures are product/code, not invented answers.

Score detail

AREA	SCORE	WHY THIS NUMBER
Product accuracy	79	Fetch caps and credit restore match code. Paywall still says 4 Home picks and seasonal rails. Live join page 404s.
User experience	73	Impatient ATSResume path is long. UPI does not finish the job. Password reset dead-ends.
AI response quality	86	Ten rounds: no subscription/Pro/trivense.app/100-recipe Home hallucinations. Weakness is length for impatient users.
Code quality	73	Recent caps are clean. Recovery, offline queue, and unapplied migration are structural holes.
Web / SEO	76	getresumescore.in and rasoiapplication.in are coherent. Trivense sits on vercel.app; Naukri keyword fights your own FAQ.
Play Store readiness	60	Open testing, extra permissions, unused audio, AdMob test-ID fallback, precise location vs Approximate Data Safety.
Security	57	Credentials file on disk, admin password spray with no rate limit, recovery session without a new-password form.

Method: Agent 1 product briefing from App/, backend/, website/ source · Agent 2 ten personas · Agent 3 dialogue review · Agent 4 code paths listed in Evidence. Not a substitute for Maestro/device QA. Exported from four-agent-qa-release-review.canvas.tsx on 5 Sep 2026.
